

## FROM OUR NATIONAL PRESIDENT

As a federal employee and a member of NTEU, you are clearly committed to public service and to the federal workforce. Our country's civil service is one of our greatest accomplishments and you are a vital part of that. Ensuring that our merit-based, professional civil service remains in place and at work for the American people requires support from our elected leaders.

Every year there are hundreds of decisions made by those elected officials that impact your pay, benefits and workplace rights. And, when decisions are being made in Washington, NTEU is in the room fighting for you every step of the way. NTEU's political action committee, TEPAC, is a critical part of that fight. TEPAC allows NTEU members like you to pool financial contributions to help elect candidates from both parties who support and protect federal employees.

Here's the simple truth: those who oppose a strong federal workforce and your union rights are well-funded and they are devoting significant resources to electing candidates who support cutting your jobs, your pay and benefits, and your collective bargaining and employee rights.

With so much at stake, we can't afford to sit on the political sidelines. I'm asking you to make an investment in your career and your future by joining your fellow NTEU members in contributing to TEPAC. Together we will continue to work to elect representatives who will treat you and all federal employees with dignity and respect.

*Anthony M. Beardon*
